An Introduction to LITIC Software
CO @ work 2015
October 9, 11:00-12:30

Johannes J. Bisschop
LITIC Co., Ltd.

Abstract.

LITIC is a brand-new fully browser-based analytics platform with a strong emphasis on User Experience Design to support the developers and users of analytic apps and services. It offers several novel features such as instant syntax checking and instant expression evaluation in a click-drag-and-drop working environment. The graphical display below gives an overview of the new platform.

The workshop presentation will consist of a brief overview with some demos, the development of two models, and a competitive element for the participants around building these two models using the LITIC software.

LITIC Software
A Faster Way to Create Analytic Decision Apps

Apps Throughout the Enterprise

Reliable App Input Data

Casual-Professional Design Studio

App Data Drilling Without Programming

ETL and Error Checking

Extensive Business Intelligence

Business Logic Driving Apps

Optimization Models Driving Decisions

Drag-and-Drop Programming

Drag-and-Drop Modeling

Collaborative Development

Apps Construction Reduced to Days

Integrated Approach, Outstanding User Experience, Low Learning Curve, Fully Browser Enabled
